1A								Up To 75% Grey Coverage													
										Clear: Use with other shades to reduce tonal deposit by approximately 1 level when mixed equally. Use alone to add shine without changing tone. CLEAR				HD Series: High Definition, pure reflects that are visible on dark bases. HD-RHD-RV				SoBoost: Mixed 3:1 (3 parts Super Sync: 1 part SoBoost). Bright, pure boosting tones for an immediate intensifying or neutralizing effect. REDBLUE			

Mixing & Processing

		Mixing Ratio:	Matrix Cream Developer:	Timing:	Apply To:	Process:
	Super Sync Clear HD Series	1:1	10 Volume (3%)	20 Minutes	Clean, at least 80% dry hair or overly porous hair lightly misted with Instacure; For best grey coverage, apply to dry hair.	At room temperature. Do not use heat.

Formulation

Step 1: Determine the base level & percentage of grey.	Step 2: Determine the underlying pigment & desired level. Super Sync can provide up to 1 level of lift. Choose a Super Sync shade up to 2 levels lighter than the desired level.	Step 3: Determine the desired tone & choose a shade that will counteract, balance, or enhance the natural underlying pigment.
--	--	---

General Application

Step 1: Grey Coverage/Blending, Virgin, Retouch & Toner — Apply Super Sync formula to base area.	Step 2: Grey Coverage/Blending, Virgin & Toner — Immediately apply Super Sync formula to the mids & ends. Retouch — Following Step 1, process for half the total time, then apply Super Sync formula through mids & ends as needed.	Step 3: When processing is complete, rinse, lightly cleanse & condition.
